Configuring and deploying AI agents

Language model library

Copy MCP Server

Detailed reference of available language models in Atlas AI, including stable, legacy, and retired models with release and retirement dates.

This article details the language models available in Atlas AI. Choose the right model based on your specific requirements for speed, quality, and context length. The availability of language models depends on your preferred cloud vendor and **the location** of your Cognite Data Fusion (CDF) project.

Cognite continuously refreshes language models with newer and more capable models for building agents. As part of this process, we retire older models.

We use these terms to describe lifecycle stages and important dates for language models available in Atlas AI:

- **Stable model**: A released model version **supported for production use**. Stable models include a retirement date when Cognite Atlas AI will no longer support them.
  - Latest stable model: The most current version within the model family, recommended for new agents or agents in development. Use this model when migrating from older versions.
  - Legacy stable model: An older model version that the latest stable model has replaced. While we still support legacy models, migrate to the latest model to access new features and improvements.
- **Recommended upgrade**: The latest stable model to migrate to for improved performance and additional features.
- **Retired model**: A model version that Atlas AI has permanently deactivated after reaching its retirement date. Atlas AI no longer supports retired models. If you don't migrate

Latest stable models

Model ID	Release date	Retirement date
azure/gpt-5.1	January 2026	No earlier than November 13, 2026
azure/gpt-5	August 2025	No earlier than July 15, 2026
azure/gpt-5-mini	August 2025	No earlier than July 15, 2026
azure/gpt-5-nano	August 2025	No earlier than July 15, 2026
azure/gpt-4.1	August 2025	No earlier than April 1, 2026
azure/gpt-4.1-nano	August 2025	No earlier than April 1, 2026
azure/gpt-4.1-mini	August 2025	No earlier than April 1, 2026
azure/o3	August 2025	No earlier than April 1, 2026
azure/o4-mini	August 2025	No earlier than April 1, 2026
gcp/claude-4.5-sonnet	September 2025	No earlier than September 14, 2026
gcp/claude-4.5-haiku	September 2025	No earlier than September 16, 2026
gcp/gemini-2.5-pro	August 2025	No earlier than June 1, 2026
gcp/gemini-2.5-flash	August 2025	No earlier than June 1, 2026
aws/claude-4-sonnet	May 2025	No earlier than May 7, 2026
aws/claude-4.5-sonnet	September 2025	No earlier than September 14, 2026
aws/claude-4.5-haiku	September 2025	No earlier than September 16, 2026

Legacy stable models

Model ID	Release date	Retirement date	Recommended upgrade
azure/gpt-4o	December 2024	March 16, 2026	azure/gpt-4.1

Retired models

Model ID	Release date	Retirement date	Recommended upgrade
gcp/gemini-1.5-pro	December 2024	September 15, 2025	gemini-2.5-pro
gcp/gemini-1.5-flash	December 2024	September 15, 2025	gemini-2.5-flash
gcp/gemini-2.0-flash	February 2025	September 15, 2025	gemini-2.5-flash
aws/claude-3-haiku	December 2024	September 15, 2025	aws/claude-4-sonnet
aws/claude-4-opus	August 2025	January 13, 2026	aws/claude-4.5-sonnet
aws/claude-4.1-opus	August 2025	January 13, 2026	aws/claude-4.5-sonnet
